## **SYLLABUS FOR CLASS XI AND XII**

### **SUBJECT: ECONOMICS (ECON)**

#### **Course Objective:**

The objective of any course is primarily twofold: first, to improve the understanding of the world around us, and to impart knowledge & develop skills in the students, which improves their employability. The HS Course in Economics has also been framed keeping these two primary objectives in mind.

The course is designed to ensure that the students develop a basic knowledge of the economic concepts, terms, theories and processes so that they can understand literatures and articles on economic issues. The course also aims at helping the students to understand the problems and challenges faced by the Indian economy as well as world economy in general and to apply the knowledge of the economics to make informed choices. The course is also intended to inculcate analytical, logical and statistical skills in a student so that they are able to analyse economic problems applying the concepts and processes they have learnt. The course should also equip them to draw conclusions and present the conclusions in an innovative way.

#### **Course Overview:**

The course consists of four modules. The first two modules offered in class XI are Microeconomics and Statistics. The next two modules offered in class XII are Macroeconomics and Indian Economic Development.

The course on Microeconomics familiarizes the students with different basic concepts of choice, demand, supply, revenue, cost and profit. The course is intended to develop an understanding about different forms of market structures their working process as well as basic concepts and processes about international trade.

The course on Statistics introduces the students to the basic concepts and techniques used in Statistical analysis of data. The course is developed with the aim of equipping the students to apply the statistical techniques in analyzing economic problems. This course will be particularly useful in conducting the project work, which is also part of the course. The students can apply statistical techniques on economic data along with the theories and concepts they learn in theoretical courses to analyse problems relating to economic issues.

The course on Macroeconomics likewise introduces the basic concepts of national income accounting and simple Keynesian Economic system to the students. The course also includes topics on Balance of payments, money & banking, government budget and taxation. All these topics are introduced at a basic level with the aim of enabling the students to understand and analyse Macroeconomic issues in an integrated framework.

Finally, the course on Indian Economic Development attempts to provide the students with an overall view of Indian Economy, the nature and path of development that the Economy has experienced and the factors that have contributed to the process of development. The topics include sectoral distribution of income and occupation, evolution of the structure of Agricultural sector, Industrial sector and Services sector and the topical issue of inclusive growth. The necessary concepts like poverty, inequality, unemployment, human development have been introduced to provide the necessary perspective for understanding and analysing Indian Economic problems.

All the courses are structured in such a way that the student can understand, remember and apply the different concepts, processes and theories. The ultimate aim is to develop the students' analytical skills and ability to develop innovative ways to address the economic problems.

## **CLASS: XII**

### **SUBJECT: ECONOMICS (ECON)**

### **COURSE CODE: PROJECT WORK**

### **FULL MARKS: 20 For Classes XI and XII Separately**

### **MARKS DIVISION: 12 [PROJECT REPORT] + 8 [VIVA]**

A project work in economics is defined as a sequence of tasks that must be conducted and completed to attain a certain outcome either based on primary data or on secondary data. Learners will undertake only one project in each academic session and that project should be within 3,500-4,000 words (excluding diagrams, tables and graphs). Own observations and conclusions, depending on self-understanding of the selected topic should be incorporated while conducting and writing the project.

#### **The Objectives of the Project Work are to enable students to:**

- explore and elucidate theoretical concepts learnt in class XI and XII.
- analyse and evaluate empirically and theoretically real-world economic scenarios using theoretical constructs and arguments.
- nurture critical thinking skills.
- develop better communication skills while collecting primary data to focus on the problems of the local economy either individually or collectively.
- help to improve cognitive abilities with a view to making them sharper and more profound over time.
- follow up different aspects of economics in which learners have interest.

#### **Topics for Secondary Data based Project Work for Class XI**

1. Study of growth of GDP/ Per capita income in India for a specific period
2. Study of changing pattern of employment in India during plan period / post-liberalization period
3. Changing pattern of export/ Import during pre-liberalization & post-liberalization period
4. Study of government expenditure on education during post-liberalization period
5. Any other relevant topic from the topics covered

#### **Topics for Secondary Data based Project Work for Class XII**

1. Study of supply of credit to the Agricultural Sector/ Industrial Growth
2. Study of poverty in India
3. Study of changing pattern of inequality in India
4. Comparison of Human Development Index between India & a neighbouring country
5. Any other relevant topic from the topics covered
